                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Appl
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 13,

APPLICANT: Joseph Bryan, Lydia Aguilar Bryan, Daniel Nelson
TITLE OF INVENTION: Sequence Encoding Mammalian Sulfonylurea Receptor
Patent No. 6031150
TITLE OF INVENTION: and Method of Detecting Persistent Hyperinsulinemic Hypogly
TITLE OF INVENTION: Infancy
NUMBER OF SEQUENCES: 49
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                         25;

Sequence 27, Application US/08980357
Patent No. 6013508
GENERAL INFORMATION:
APPLICANT: ARTHUR, MICHEL
APPLICANT: DUKTA-MALEN, SYLVIE
APPLICANT: OUNTA-MALEN, SYLVIE
APPLICANT: OUNTA-MALEN, PATERICE
TITLE OF INVENTION: POLYPEPTIDES IMPLICATED IN THE
TITLE OF INVENTION: PREPRESSION OF RESISTANCE TO GLYCOPEPTIDES, IN PARTICULAR
TITLE OF INVENTION: IN GRAM-POSITIVE BACTERIA, NUCLEOTIDE SEQUENCE CODING FOR
TITLE OF INVENTION: THESE POLYPEPTIDES AND USE FOR DIAGNOSIS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          2055 -----WIQGEIIDCNLRGKTAQSQTRLCRL----RGRFKYFILPTI--LRRRLKMKKLFF 2103

                                       Sequence 98, Application US/09789561

Patent No. US20020064818A1

GENERAL INFORMATION:

TITLE OF INVENTION: 52 Human secreted proteins
FILE REFERENCE: P2043P1

CURRENT PEPLICATION NUMBER: US/09/789,561

CURRENT FILING DATE: 2001-02-22

PRIOR APPLICATION NUMBER: 60/152,317

PRIOR PILING DATE: 1999-09-03

PRIOR FILING DATE: 1999-09-03

PRIOR FILING DATE: 1999-09-03

PRIOR FILING DATE: 1999-09-03

PRIOR FILING DATE: 1999-09-03

NUMBER: OF SEQ ID NOS: 194

SOFTWARE: PatentIN Ver. 2.0

SEQ ID NO 98
